

Guinness Open Gate Brewery

Guinness Comes to Chicago

LOCATION	Chicago, IL
SECTOR	Commercial
MATERIALS	Q Cell 480w panels & SolarEdge inverter
SYSTEM SIZE	100 kW

About The Project

The Guinness Open Gate Brewery is Guinness' 2nd location in the United States, and first in the Midwest. This beautiful establishment includes a taproom, restaurant, and first ever Guinness bakery. Not to mention that they brew 5 different beers on site. The Guinness taphouse has quickly become a Chicago landmark. From the specialty glasses with the Chicago flag, to windows that show the Metra trains as they fly by, and the Giardiniera sold inside, this place thoroughly represents the city. The food is great, the atmosphere is even better, and all under a large solar array. Go check out the Guinness Open Gate Brewery for your next outing or date night!
