

Heartland College

Heartland College Goes Solar

LOCATION	Normal, IL
SECTOR	Commercial
MATERIALS	Q Cell Panels & SolarEdge Inverter
SYSTEM SIZE	216 kW

About The Project

This solar PV system contributes to the Net Zero status of the new Agricultural Education building at Heartland College in Normal, IL. This project utilizes both the flat and pitched roofs of the building, and is only a part of a great deal of other sustainability measures taken during the construction of this facility.
